

## Dead Blow Hammers & Sledges

### With Replaceable Urethane Faces

- Head castings feature an unobstructed cavity partially filled with iron shot for maximum dampening or dead-blow action
- Rugged head castings are made of **either malleable iron** (heavy dead blow = H) or hi-tensile, **non-sparking aluminum** (light dead blow = L)
- Safety grooved hickory handle allows for firm, comfortable grip regardless of oil or perspiration
- The head casting is joined to the hickory handle by Lixie's patented wedge and epoxy bond
- These hammers are excellent for seating work in vises, fixtures or die sets, separating die sets, straightening castings, etc.
- Lixie Dead Blow Sledges have the same features as the Hand Dead Blows, and are used where a heavy blow is desired. Furnished with smooth grip handles.
